

# ARTICULATING DUCT ARM

---

---

## OVERVIEW

Articulating duct arms provide a flexible solution for duct positioning. Engineered to accommodate various duct sizes these rigid arms are position able by hand.

---

## KEY FEATURES

---

- Custom engineered for reach and flow rate capability
- Optimized for high flexibility and range of motion
- Stress analyzed for rigidity
- Flexible solutions tailored to specific unit under test and customer facility
- Turn-key system delivery
- Designed for wide range of duct diameters
- Lightweight aluminum construction
- Position able by hand
- Sealed at joints to allow pressure-controlled testing
- Remote automated vertical drop duct positioning
- Universal usage
