

GASEOUS FUEL METERING PANEL

OVERVIEW

Gaseous fuel panels are engineered to accurately deliver and measure gaseous fuels for engine testing.

KEY FEATURES

- Custom engineered for required footprint
- Integrated with data acquisition and controls
- Flexible solutions tailored to required volume and treatment conditions
- Turn-key system delivery
- Accurately measure and monitor gas flow rate and pressure
- Incorporate various regulator paths for coverage of a wide range of units under test
- Fully automated through test cell controls
- Natural Gas
- Propane
- Hydrogen
